△ github.com/GerMoren

Entre Ríos, Argentina

Backend engineer building dependable systems for commerce, SaaS, and operational platforms. Focused on Node.js, TypeScript, Go, AWS, event-driven and serverless architecture, search, observability, and developer enablement.

EXPERIENCE

Jul 2026–Present **Steplix**

Dec 2025–Mar 2026 *Backend Engineer*

- Implemented backend components for serverless telecom and eSIM activation solutions with Go, AWS Lambda, Step Functions, DynamoDB, and delivery pipelines.
- Participated in state-machine design, workflow integration, monitoring, and supporting web/mobile products.

Apr 2026–Jun 2026 **Cencosud**

Senior Backend Developer

- Built **cenco-pim-config** with NestJS and hexagonal architecture for the Cenco PIM ecosystem.
- Applied CQRS with MySQL writes and OpenSearch reads; defined Kubernetes deployments, container hardening, and GitHub Actions workflows.

Jul 2021–Nov 2025 **Tiendamia**

Backend / Full Stack Developer

- Migrated critical APIs from PHP/Magento to Node.js and integrated hybrid search with Amazon SageMaker and OpenSearch.
- Applied CQRS, DocumentDB read replicas, RabbitMQ, Redis, and domain-driven design; built reusable Node.js packages.

Jun 2020–Jul 2021 **Chiper**

Full Stack Developer

- Built B2B commerce APIs and microservices with Node.js, TypeScript, NestJS, and React; supported GCP and Jenkins delivery.

SELECTED PROJECT

Junando

github.com/GerMoren/junando ↗

Personal open-source alert correlation agent and compact reference for event-driven backend design and observability.

CORE SKILLS

Backend: Node.js, TypeScript, Go, NestJS, REST APIs, microservices, CQRS, DDD · **Cloud:** AWS Lambda, SQS, Step Functions, API Gateway, DynamoDB, Kubernetes, GitHub Actions, GCP · **Data:** OpenSearch, DocumentDB, MySQL, PostgreSQL, Redis, RabbitMQ
