

Backend engineer building dependable systems for commerce, SaaS, and operational platforms. Focused on Node.js, TypeScript, Go, AWS, event-driven and serverless architecture, search, observability, and developer enablement.

EXPERIENCE

Jul 2026–
Present

Steplix

Backend Engineer

- Implemented backend components for serverless telecom and eSIM activation solutions with Go, AWS Lambda, Step Functions, and DynamoDB.
- Adopted the Gentle AI ecosystem (Engram, SDD, custom skills/harnesses) for AI-assisted engineering workflows.

Apr 2026–Jun
2026

Cencosud

Senior Backend Developer

- Built **cenco-pim-config** with NestJS and hexagonal architecture for the Cenco PIM ecosystem.
- Applied CQRS with MySQL writes and OpenSearch reads; defined Kubernetes deployments, container hardening, and GitHub Actions workflows.

Dec 2025–Mar
2026

Steplix

Backend Engineer · Client telecom platform

- Implemented state machines and monitoring (CloudWatch, X-Ray); built **caap.aero** in Next.js (Lighthouse 96/87/96/100) and the **Mi Alarma X-28** app in React Native (50k+ downloads).

Jul 2021–Nov
2025

Tiendamia

Backend / Full Stack Developer

- Migrated critical APIs from PHP/Magento to Node.js (~60% faster API response times) and integrated hybrid search with Amazon SageMaker and OpenSearch.
- Applied CQRS, DocumentDB read replicas, RabbitMQ, Redis, and domain-driven design; built reusable Node.js packages.

Jun 2020–Jul
2021

Chiper

Full Stack Developer

- Built B2B commerce APIs and microservices with Node.js, TypeScript, NestJS, and React; supported GCP and Jenkins delivery.

SELECTED PROJECT

Junando

github.com/GerMoren/junando ↗

AI/ops alert correlation agent: hexagonal architecture, Redis fingerprint deduplication, swappable LLM provider (Gemini/Claude/OpenRouter), AWS CDK, Apache 2.0.

CORE SKILLS

Backend: Node.js, TypeScript, Go, NestJS, REST APIs, microservices, CQRS, DDD · **Cloud:** AWS Lambda, SQS, Step Functions, API Gateway, DynamoDB, Kubernetes, GitHub Actions, GCP · **Data:** OpenSearch, DocumentDB, MySQL, PostgreSQL, Redis, RabbitMQ · **Quality:** Jest, Mocha, SonarQube, CloudWatch, X-Ray, Grafana, Trivy · **AI & agents:** LLM integrations, Gentle AI (Engram, SDD), Confluence, Rovo
